

Arancia | www.arancialighting.com

Arancia is dedicated to designing and producing high-end architectural lighting fixtures. Located and manufactured in Canada, each light fixture is designed from scratch, around a vision to make simpler things work in an elegant way. Production is made to order; quality control is key.

Architectural Safety Components | www.architecturalsafety.com

LELU™ establishes a new set of priorities for safety-related building components. Namely, an exit sign should exceed its important life-safety function by incorporating aesthetic and technical ambitions into the design.

Astro | us.astrolighting.com

Astro Lighting has been designing quality transitional lighting in the UK for a myriad of applications since 1997. Whether it be for the bath, bedroom, café, or public areas, Astro has focused on providing “Elegant Simplicity” at an excellent value.

Axolight | www.axolightusa.com

Combining an Italian passion for design with Venetian tradition, Axolight has been creating high quality light fixtures for the world since 1996. Axolight aims to develop lighting to suit any environment, whether modern or traditional, public or private. Their lighting collections offer options for energy efficiency including LED and/or fluorescent.

B.lux | www.groupoblux.com

B.lux, located in the Basque Country, is a leader in the production and release of contemporary design lamps. Design and its status as a manufacturer constitute the cornerstones of its organizational strategy.

Bold Lighting | www.boldlighting.us

Bold products provide lighting designers, architects, engineers and interior designers the luxury of creating spaces with optimal illumination, combined with the benefit of quiet aesthetics. Their award-winning team provides a holistic approach to product design, ensuring fixtures blend seamlessly into the environment, while maintaining the highest of quality. Architecture should be seen; lighting should be quietly bold.

Boyd Lighting | www.boydlighting.com

Boyd Lighting blends time-honored techniques with state-of-the-art LED technology to create beautiful lighting for inspired residential and commercial environments. Handmade in Colorado.

CTO Lighting | www.ctolighting.co.uk

Founded in 1998 by Chris and Clare Turner, CTO Lighting launched their first collection on the guiding principles of designing lights of uncompromising quality, using only the finest materials and working with elite British craftsmen. This collection of lighting symbolized elegance and the excellence of British design and manufacturing; the benchmark for all future collections.

DLS | www.dslightingus.com

Design Lighting Selection U.S. presents lighting tools to create drama. Specification grade LED fixtures that offer simplicity and elegant precision. Careful consideration has been given to create function, form, and lasting quality. DLS offers ultra-sleek fixture designs that compliment and accentuate commercial and residential architecture.

Edison Lighting Group | www.edisonlighting.ca

Edison Lighting Group, a Canadian manufacturer of architectural lighting solutions for commercial, institutional, hospitality and retail projects. They integrate the latest LED technology, including BIOS, while incorporating sustainable manufacturing materials and techniques. Edison Lighting has 3 collections: Acoustic, Shapes, and Linear, and all are available to modify and customize to meet your project needs.

El Torrent | www.eltorrent.com/en

El Torrent, a Spanish decorative lighting company founded in 1997, creates handmade luminaires that are inspired by organic and natural shapes. They utilize a wide variety of natural materials such as paper, ceramic, glass, and cotton cording, to create light fixtures that are suitable for both interior and exterior applications.

Estiluz | www.estiluz.com/en_US

Founded in 1969 in Spain, Estiluz is committed to high-end decorative lighting with innovative designs and impeccable finishes that are robust and durable. Designs include a wide variety of pendants, both small and large scale, sconces, table lamps, ceiling lights, and floor lamps, for both interior and exterior applications.

Evo-lite | www.evo-lite.com

Evo-lite Advanced Luminous Solutions leads the way in innovative technology, specializing in avant-garde backlighting products that redefine spatial aesthetics. Through pioneering materials and sustainable design, they deliver a diverse array of luminous solutions, from architectural backlighting installations to interior designs, seamlessly fusing energy efficiency with captivating visual appeal. Evo-Lite shapes the future of illumination by uniting ingenuity, sophistication, and environmental mindfulness in their state-of-the-art lighting innovations.

FOC | www.foc.lighting

Inspired by nature's light and darks, energy, reflection, shadow and glow, fixtures animate the space they occupy. Manufactured in Valencia, Spain, FOC celebrated 75 years in business by expanding offerings to the US. Renowned in Spain for minimalist-design lighting, each light object evokes originality, creating a provocative presence in any space.

Innermost | www.innermost.us

Innermost' approach to decorative lighting comes from a shared pursuit of design freedom and a belief that you must embrace the absurd to innovate. So Innermost has innovation and a little absurdity at its core; working with designers from all corners of the globe to create beautifully unique products of the absolute highest quality

Intra Lighting | www.intra-lighting.us

For 30 years, Intra lighting has established itself as a global provider of smart lighting solutions. Characterized by project experience, quality performance products, efficiency, sustainability, and reliability, its main goal is to contribute to the quality of living with both modern architecture and design aesthetics in mind. The products are not only innovative but more so driven by the knowledge, creativity, and experience of those creating them.

Joker Light | www.jokerlight.com

Jokerlight, is a Spanish manufacturer and is known as ArkosLight in Europe. Their products are meticulously researched, incorporate cutting edge of technology, performance, and boast award winning designs. Products are available in a variety of features to help meet your project needs including optics, color temperatures, beam angles, luminous packages, finishes, and dimming. They have been recognized for their designs that emphasize visual comfort, with their "Black Foster" family of designs achieving UGR ratings of 0. Jokerlight is committed to sustainability, in both the design of their products, as well as their packaging materials.

KLUS Design | www.klusdesign.com

Klus has customizable, quality-tested specification grade commercial LED Tape light and a wide variety of aluminum extrusions, for both interior and exterior application, that support stunning architectural projects. Factory support for custom applications can help the lighting designer realize their best ideas.

Kreon | www.kreon.com

Kreon design represents a way of thinking that reduces each product to the essential components without compromise. With a deep understanding of the intrinsic nature and unified components of architectural styles, components can be condensed into basic forms, which Kreon exploits within its products. This approach does not result in austere minimalism, but in architectural objects that communicate with space, regardless of style.

LED Linear | www.ledlinearusa.com

Award winning linear LED products offered in multiple white color temperatures and color changing RGB. A wide range of fixture housings for both interior and exterior applications with an ingress protection rating of up to IP68.

Lee Broom | www.leebroom.com

Lee Broom is one of the UK's leading product designers and a premium global design brand consisting of decorative lighting fixtures, furniture, and accessories. The designs are unique but also familiar, taking classical styles and traditional materials and reinterpreting them in new and contemporary ways, always with an unexpected edge. The designs combine craft, heritage and modernity and can be seen installed in many projects around the world

Leucos | www.leucos.com/en-us/

Leucos, where handblown glass represents local tradition but behind every new product there is a global ambition.

Light Engine | www.lightengineled.com

Light Engine wants to start a revolution in the industry. By harnessing the full, artistic potential of LEDs, they bend light in ways not possible from traditional lighting methods.

Luceplan | www.luceplanusa.com

Founded by architects, Luceplan combines award-winning history, innovation, and purpose to create beautiful decorative fixtures as well as acoustic lighting products with sound-absorption up to 3x the value of acoustic tile.

Luciole | www.luciolelighting.com

Luciole designs and manufactures contemporary lighting fixtures in their factory located in Montreal, Canada. In continuous collaboration with architects and designers, Luciole develops products according to the changing needs of the specification industry. The products from Luciole are designed to be sustainable and are dedicated to the commercial, institutional and residential sectors.

LumenWerx | www.lumenwerx.com

LumenWerx designs and manufactures linear and recessed luminaires for general interior illumination in architectural spaces. With strong and flexible technical capabilities, LumenWerx supports both standard and innovative product offering in an array of possible applications. As the lighting world shifts its focus to LED luminaires, LumenWerx is proud to offer application-specific variations to meet the high demands, as well as the time constraints needed in today's fast paced construction schedule.

NewMat | www.newmatusa.com

The ideal system for backlit applications, NewMat offers several membranes of different colors. NewMat works well with either natural or artificial lights and can be installed as a single- or double-layer system for better light diffusion. In addition, a second layer will serve as a dust/particle barrier. NewMat membrane may also be micro-perforated upon request for better acoustical performance.

No. 8 Lighting | www.8lighting.com

Created by Lighting Designers, No. 8 Lighting offers state-of-the-art technology and stunning design for the ultimate recessed lighting fixture. Available in halogen and LED lamping modules, No. 8 Lighting has an array of magnetic trims in different finishes and styles for all ceiling types.

OPUSLED | www.opusled.com

Assembled in USA OPUSLED lighting offers complete families of design, in a wide range of finish options that can transform spaces into environments where occupants feel comfortable, productive, and relaxed based on the project's desired purpose. Opus fixtures have an extensive offering of LEDs and CCTs, and drivers for controls compatibility. Exceptional optics are achieved through both TIR and sub lens options.

Penta Light | usa.pentalight.com

Born in 1975, Penta Group is three companies of excellence able to accept and satisfy various needs of the lighting market. Whether it's decorative, technical, or custom, Penta always produces the style and quality of products made in Italy.

Stickbulb | www.stickbulb.com

Stickbulb LED fixtures are B Corp Certified, Climate Neutral Certified, and handcrafted in New York City from sleek wooden beams using reclaimed materials sourced from locally demolished buildings and sustainably managed forests. Stickbulb products range from small desk lamps to room-filling custom installations. Born from a pile of scrap wood, the original objective of Stickbulb was to "build with light," which has since been fulfilled in projects for brands like Google, Blue Bottle, and Erewhon, as well as private commissions for hotels, offices, and residences across the globe.

TIBO Lighting | www.tibolighting.com

Elegantly crafted, minimalist decorative illumination meticulously engineered in the creative hub of Montreal.

UltraLights Lighting | ultralightslighting.com

UltraLights was founded in 1988 in Tucson, Arizona. We are makers of beautifully crafted commercial and residential decorative lighting, easily modifiable to your specifications. Our American-made lighting combines ingenuity, dedication to craft and timeless design to elevate how people experience your spaces. Our culture embraces challenges with a can-do attitude, and our commitment to personal service is a point of pride and reputation. This is the heart of UltraLights.

Zumtobel | www.zumtobel.us

Zumtobel produces innovative European design for U.S. manufactured products, linear fluorescent and LED downlighting and track, as well as decorative product offering.
